

lynx-id – A Python package for re-identifying lynx on images from camera traps

1 November 2024

Summary

Blabla.

Statement of need

Paragraph on biodiversity loss, the use of cam traps, and computer vision. Felids, and lynx. Densities. Connectivity. Etc.

Re-id. Biblio.

What we provide here. Up-to-date.

Implementation

Package installation and use

How to use, plus example.

Conclusions

What it is, what it brings, how it can be useful.

Perspective. Other felids. Re-trained as new images arrive.

Acknowledgements

Thank you. Jean Zay. CNRS for engineer time. CNRS for funding.
